MEMORANDUM FOR: Chairman, Editorial Board, "Studies in Intelligence"

SUBJECT: Review of, "Economic Intelligence and Economic Warfare," by B. H. Williams

1. Departing from my usual state of omphaloskepsis, I have read Mr. Williams book, which was published by the Industrial College of the Armed Forces in 1954. I find it mostly chaff.

2. This book, in my opinion, is not worth including in the "Fifty Best." It contains many errors, is deficient in interpretation, and is downright misleading in spots.

3. We shall try to find something better to be "inputted."
